

#### EXTERNAL CONSTRAINTS:

- if user.type = full\_price, the relationship with hosts does not exist
- the domain for user.internal.type is: helper, super\_helper or full price (one of the three!)
- either day\_one or day\_two in user-needs-gear needs to be true (NO??? sbagliato secondo me)
- if (internal!!!!!!)user.matric\_number >= 21xxx then the relationship with hosts becomes mandatory
- user.eating.intolerance is an open field so it should be stored as a long string
- if user.eating is vegan, then automatically also the vegetarian one is ticked
- if user.external.needs\_accomodation is false, then user.external does not need to participate in the relationship hosts
- user.intenal.hosting can assume values from {0,20}
- user.intenal.address.type can assume two values: dorm OR WG
- sport.name can assume one of the following values: snowvolley, snowsoccer, skirace\_M, skirace\_F
